

20' Clear Vinyl Tubing

PROFESSIONAL CLEAR VINYL TUBING FOR HOME USE

SimpleAir® Clear Vinyl Tubing can be used with air conditioning and refrigeration condensate drain lines, condensate pump discharge lines and humidifier overflows. The tubing is made from a non-toxic clear polyvinyl chloride and has an extra flexible design that resists kinking due to a durometer value of 80 (Shore A) and a thick outer wall. SimpleAir® Clear Vinyl Tubing can be used with a maximum service temperature of 140°F (60°C) and performs better in cold weather climates than standard clear vinyl tubing.

Can be Used with:

- Air Conditioning & Refrigeration Condensate Drain Lines
- Condensate Pump Discharge Lines
- Humidifier Overflows

20' Clear Vinyl Tubing:

3/8" inner diameter

Non-toxic clear polyvinyl chloride

Extra flexible design to resist kinking

Maximum service temperature of 140°F (60°C)

Better performance in cold weather climates

SACVT-1238-20
